## LOCAL AIRPORT INSPECTED BY OFFICIALS

Lockheed Electra Monoplane Landed Here; On Trans-Canada Flight Inspecting Airports

### Do You Golf Or Fish?

This District Offers Attractions to Visitors From Afar on Summer Vacations.

During the summer months many tourists motor through the Crow's Nest Pass. They usually do not stop, but pass on to the widely advertised resorts of British Columbia.

The tourist business has assumed the importance of an industry to Canada, particularly Alberta and British Columbia, which offers attractions unexcelled anywhere.

The course of the Crow's Nest Pass Golf and Country Club is available to visitors at a small fee, and for scenic beauty it is hard to beat. For those who prefer trout fishing the north or the south forks provide splendid camping spots, and more would take advantage of these places as vacation resorts were they better known.

Living close to these vacation spots, local people do not appreciate them to the extent as visitors from afar. Yet there is no nicer vacation land in the west than in the hills and dales of this district. He who has not enjoyed the early morning air of the mountains when on a fishing trip has missed an experience well worth while.

A number of golf players from Fernie played against members of the Crow's Nest Golf Club at Blairmore on Sunday, Coleman players winning most of the competitions.

### COLE'S THEATRE BELLEVUE

Thursday, Friday and Saturday  
July 15th, 16th and 17th

William Powell and Myrna Loy  
in

"After The Thin Man"  
a sparkling sequel to the

### COMING

Thursday, Friday and Saturday  
July 22nd, 23rd and 24th

"Theodora Goes Wild"

A graceful twin-motored Lockheed Electra monoplane aroused interest last Thursday evening as it arrived from the west, circled over the town twice, then made a perfect landing on the airport west of town. In the plane (from left to right), were A. D. McLean, of Ottawa, federal government superintendent of airways; Phillip G. Johnson, of Seattle, vice-president in charge of operations of Trans-Canada

Airlines Ltd.; Wing Commander D. R. McLaren, D.S.O., D.F.C., M.C., of Vancouver; D. B. Colyer, of Chicago, vice-president of United Air Lines; Mayor D. H. Elton, of Lethbridge, who greeted the fliers when they arrived at that city, where the above photo was taken by the Herald staff photographer, and at the extreme right Squadron Leader J. H. Tudhope, M.C., of Ottawa, chief pilot of the

plane. It is of interest to note that A. D. McLean, superintendent of airways, is a brother of Dr. McLean, of Coleman. He was the first official to locate the airport west of town. In company with H. T. Halliwell, of the Board of Trade, he decided on the location in 1933, and work was commenced under the department of Mil-

tia and Defence as a relief project. The field is classified as an intermediate aerodrome, and will ultimately be 4,000 feet long, and 300 or 400 feet wide. It will be an important link in the trans-Canada route and two-way communication with planes flying over the mountains will be maintained by means of a radio station already established here.

### Roadwork Commencing

70,500 lbs. of asphalt arrived this morning for the surfacing of roads in town. Gravel has been hauled from the vicinity of Sentinel by Contractor D'Appolonia, and work will commence at once.

### LOCAL AND GENERAL

William Burns, formerly employed in McGillivray power house as engineer, and who for the past few years has lived in Edmonton, is reported to have taken over duty at the East Kootenay power plant at Crow's Nest lake as engineer on August 1. Mr. Wyman is plant superintendent, and Mr. Gale chief engineer. Mr. Burns was mayor of Coleman for seven years.

Writing from Halifax, Mrs. J. C. Hodgson, on behalf of her mother, Mrs. James Scott, sends best wishes through The Journal to their old friends in Coleman. The late Mr. Scott, resident here for many years, will be well remembered as master mechanic at International mine.

The 50th wedding anniversary of two highly respected Coleman residents, Mr. and Mrs. Alex. Cofie, will be celebrated during the coming week. Many good wishes will go forth to them from a host of friends in Coleman.

C. J. Tompkins returned on Monday from several weeks visit at his old home in Nova Scotia. He spent a very enjoyable time there visiting old acquaintances of long years ago.

### In Memoriam

SCOTT—In Loving Memory of James Scott, who passed away July 14, 1936.

Sadly missed by his wife, daughter and two sons.

### ANNOUNCEMENT OF PICNIC

The Ladies' Auxiliary of the Canadian Legion will hold their annual picnic at Crow's Nest Lake on SUNDAY next, JULY 18. Members and friends will meet at 10.30 a.m. at the Oddfellows' hall. All members and families of the Legion cordially invited.—Mrs. W. H. Garner, secretary; Mrs. J. Hirst, president.

### Various Important Matters Engage Attention of School Trustees at Regular Meet'g.

#### MINUTES OF SCHOOL TRUSTEES MEETING

July 9, 1937.—A special meeting was held on this date. Present were Trustees Fraser, Greenhalgh and Fleming.

The minutes of the last regular were read and on the motion of trustees Greenhalgh and Fleming, were adopted.

It was moved by Trustees Greenhalgh and Fleming that the applicant, Mrs. Blazenko, be written a letter notifying her that as the tax roll is closed for the year 1937 nothing can be done about her appeal.

Moved by Trustees Greenhalgh and Fleming that the list of school supplies as presented by Mr. F. Peterson be sent out for tenders.

Moved by two teachers, members of the Teachers' Alliance, be invited to attend the meeting of the Board in a consultative capacity.

Moved by Trustees Greenhalgh and Fleming that the application received from Miss Hanley be filed.

Moved by Trustees Greenhalgh and Fleming that Dr. R. K. Lillie's dental contract be renewed on the same terms for the coming year.

Moved by Trustees Greenhalgh and Fleming that S. Moore's contract be renewed, and if there are more pupils for the coming year, the board will meet Mr. Moore and discuss arrangements with him.

Moved by Trustees Greenhalgh and Fleming that Trustee Sharp be appointed to act on the works and property committee with Trustee Fleming.

#### IMPROVEMENTS TO SCHOOL GROUNDS

A start has been made on cleaning up the grounds left vacant by the removal of the old school buildings. There is scope for making a good appearance of the school frontage and grounds, similar to what was done at the town hall some years ago.

Looking over the financial statement of the school district for 1936 it is noticed over \$14,000 arrears of taxes. Arrangements might be made whereby labor provided by some who, unable to pay the taxes, would be agreeable to give some work in part pay-

#### PRINCIPAL HOYLE'S CONTRACT TERMINATED

At the meeting of trustees held on July 9, at which Trustees Fraser, Fleming and Greenhalgh were present, the following motion by Fleming and Fraser was carried: That Mr. Hoyle be notified that his services be not required to teach in Coleman high school.

Reasons for the termination are not given. It is reported that the matter has been referred to the Board of Reference by the local branch of the Teachers' Alliance.

#### LETTER FROM INSPECTOR

Owen Williams, B.A., Lethbridge school inspector, wrote a letter to the board asking them to reconsider their action in not renewing the contract with W. J. Moffatt as supervisor of music. He stated he was interested because it was largely on his recommendation that Mr. Moffatt had been appointed. No action was taken on the letter.

A large number of applications from teachers seeking appointments were received by the board. All were ordered filed.

In connection with the work of juniors during the summer holidays, Trustee Sharp moved that all work in conjunction for the most expeditious handling of the work to be done in the buildings.

The old bank school building was ordered to be again advertised for sale twice in The Journal.

#### CHECKING UP TAXPAYERS

At a recent meeting of the school board it was decided to check up on those eligible to pay educational tax of \$4.00, it being reported by some members of the board that there were a number who had not been paying. All single men working in town are eligible, as well as married men living in rented premises.

Some of the unskilled labor employed in ten days motor trip to Spokane and other Washington cities, and returned via Penitentiary, where they spent five days visiting their daughter, Mrs. Hockley, formerly of Natal.

### COLEMAN SCHOOL DIST.

### SALE OF OLD SCHOOL BUILDING

Known as the bank school, same will be sold to the highest bidder. The whole may be tendered on, or interior fixtures may be tendered on separately. Address tenders with deposit cheque of \$10 to the Secretary, Coleman School Trustees, before the end of July. Condition of purchase is that ground must be left clear on removal of building.

### LOCAL NEWS

Miss Mercer, of Alexo, was visiting her sister, Mrs. Gillies, last week.

Mrs. J. R. Atkinson, Jr., was a visitor to Calgary during Stampede week.

Miss Marjorie Halliwell is spending two weeks visiting her sister, Mrs. George LeRoy, at Penitentiary, B.C.

Mrs. J. F. Spillers is spending a few weeks with her daughter, Mrs. T. McDicken, at Trail, B.C.

Miss Muriel Naylor and young brother Pat left on Sunday for two weeks holiday in Vancouver.

Mrs. Fairfull, of Calgary, was the guest of Mrs. W. H. Garner during a brief visit in Coleman last week.

Eric Bergquist, employed for a considerable time as a rock driller by the mining companies, has left for his farm in British Columbia.

Mr. and Mrs. W. E. Mayer, of Youngstown, Ohio, and baby daughter, are visiting Mrs. Mayer's parents, Mr. and Mrs. Kahout.

Mr. and Mrs. A. Brown and Olive plan on leaving on Saturday for two weeks holiday at Coeur d'Alene, Idaho.

Mr. and Mrs. N. Burtinick and daughter Ethel motored to Brandon, Man., to visit Mr. Burtinick's brother and wife.

Mr. and Mrs. J. Clark and son Clarence enjoyed a ten days motor trip to Spokane and other Washington cities, and returned via Penitentiary, where they spent five days visiting their daughter, Mrs. Hockley, formerly of Natal.

### The C.P.R. and 'Silent Barriers'

Steve Krawzy Calls Attention to Inaccuracy in Report of Railroad Route at Rogers' Pass.

Steve Krawzy calls attention to a story published recently in The Journal about the construction of the C.P.R. and Rogers' Pass. Steve states that the railroad leaves the water level entirely, and goes over the top of the mountain at Rogers' Pass. He knows, because he worked up there a number of years ago, and Mrs. Krawzy's parents live in Revelstoke, near where the picture "Silent Barriers" was filmed.

Having this brought to our attention, reference was made to the C.P.R. altitude table of their main line, and some interesting information is gleaned from it. The highest point of their entire system is Stephen, B.C., west of Lake Louise six miles, the railroad being 5326 feet above sea level. There is a steady drop from there to Moberly, B.C., a distance of 55 miles, the altitude being 2553 at this point, 2773 feet lower than at Stephen. Rogers' is 2596 feet, and Glacier, 17 1/2 miles west, again rises to 3778 feet, an increase of 1182 feet. There is then a steady drop to Revelstoke, 1495 feet, while Craigellachie, where the last spike was driven by Sir Donald Smith, later Lord Strathcona, is only 1225 feet above sea level, which is considerably lower than Lethbridge or even some of the prairie towns in Saskatchewan. Regina in central eastern Saskatchewan is 1896 feet above sea level, thus being 671 feet higher than where the last spike was driven. Another surprise to many would be to learn that Calgary is 124 feet higher above sea level than Fernie, B.C., their respective altitudes being Calgary 3437, Fernie 3313.

But continuing on the C.P.R. main line west, the railway keeps dropping to Siksana, where it is 115 feet. It then takes another rise for several miles to Notch Hill, 1691 feet, whence it takes a steady drop on its way to Vancouver, where the railroad is 14 feet above sea level.

If you want to secure more detailed information on the altitude of the C.P.R. through the Rockies, one of their time-tables will give you a wealth of information, on mileage and altitude, from the Atlantic to the Pacific.

If you have sufficient imagination, you might start out and carry in your mind the rises and falls of the entire system by just checking the altitude table with the stations you pass through. It is an interesting pastime. One man had such a hobby for studying time tables that he even collected Chinese and Japanese railroad time tables, and he could tell you what equipment any railway had on any railroad in the world, and its time schedule.

Returning to Steve's statement outlined in the first paragraph of this story, if you wish to debate the matter further, just go and talk it over with him. He'll likely set you right if in doubt.

### Watch The Journal's "Shopping News" Next Week

Coupon Prize-Winners' Names Will Be Announced — Home Shopping Campaign Gains Popularity.

The campaign to promote home-buying gains favor, judging by the increased number of coupons deposited at stores this week, being double that of the two previous weeks. Under the plan, Coleman stores offer specials at the week-end when it is a pay-day, which are marked down at low prices. Naturally they aim to secure 100 per cent of the local retail business, and if values, quality and service are considered, they are deserving of it, for they give the people the benefit of co-operative buying.

The Journal distributes circulars to every home in town and suburbs, containing a contest. This shopping news is eagerly looked for as a regular feature, containing a wealth of information on bargains in household requirements, particularly in groceries. WATCH THE JOURNAL and its Shopping News.

## Confidence Restored

The recent announcement of Prime Minister Neville Chamberlain and Foreign Secretary Anthony Eden of Great Britain's intention to face her responsibilities by rearmament as speedily as possible and to such an extent that "nobody dare treat her with anything but respect" will fall on many receptive and welcoming ears, not only within Great Britain and the Empire but in other countries who look to Britain for leadership in the task of preserving the democratic form of government.

There is no question but that Britain has "lost face", to use an Oriental expression, during the past two or three years, because of her failure to take a stand in the councils of the League of Nations strong enough to prevent the rights of member nations being violated.

Representative newspaper and magazine writers in some of the smaller democratic countries of Europe, such as the Scandinavian group, who have been wont to look to Britain for leadership and who, at any rate in recent years, have been strong friends of Great Britain have, in the past year or two voiced keen disappointment at the situation and more particularly have expressed criticism over the Ethiopian debacle.

But there was a very good reason why Britain could not go further than she did in attempts to enforce sanctions against Italy as the violator of Abyssinia. No one knew better than the British representatives on the councils of the League that if coercive measures were needed to prevent despoliation of the northern African kingdom she was not in a position to ensure that these measures were carried out.

The British war machine, and particularly the aerial arm of it, had been allowed to become obsolete and no efforts had been made to bring it up to date; or, conversely, it might be more correct to say that other and more belligerent nations had built up huge destructive forces and little or nothing had been done by Britain to keep pace with their activities.

Under these circumstances it would have been futile for Britain to have displayed a fist which was not heavily mailed or to have uttered threats which she could not carry out. She did not want to start something she knew that she could not finish. Hence, nothing more could be expeditiously done than advise and negotiate, in the knowledge that anything more forceful might precipitate a disaster which the great majority of nations hoped to avoid. It was a policy of prudence and that was the only policy that could safely be adopted at the time.

Now, however, that is to be changed. Great Britain has already commenced an active and ambitious program of rearmament which, in a year or two at the outside, will enable her to resume her role as leader of the European and world democracies in the full knowledge and certainty that the utterances and decisions of her representatives will be respected by even the most powerful and belligerent of nations.

The general objective of the program was aptly expressed by Prime Minister Chamberlain when he told his constituents that it was the aim to make Britain so strong "that nobody dare treat her with anything but respect" and his additional announcement that he faced his responsibilities "without fear or hesitation" will inspire confidence not only in Britain but in many other countries who are genuinely anxious to preserve world peace, as is Britain herself.

Confidence will be further fortified by the supplemental declaration of Sir Anthony Eden that immediate and specific objectives are preservation of the territorial integrity of Spain and the maintenance of the Mediterranean as a main arterial road for the flags of all nations.

Both these objectives have been threatened in recent weeks as the war in Spain progresses. The dismemberment and even the potential dismemberment, of Spain would undoubtedly precipitate a general conflagration in which all the European countries might ultimately become involved and that is what the majority of the non-belligerent nations of Europe fear so much to-day.

Despite the declarations of individual visitors from Europe to this continent to the effect that a general war will be avoided, it is generally recognized on both sides of the Atlantic that the trend of events in Spain, coupled with a great deal of outside interference, constitutes a grave danger to the peace of Europe and perhaps of the world.

A strong and well-armed Britain, with no ulterior motive to serve, will go a long way to allay such alarms and will do much to ensure peace in Europe and security for the democratic countries of that continent.

### Something New To Try

According to the Christian Science Monitor, to Horace Greeley, the famous editor, a woman once wrote: "Our church is in dire financial straits. We have tried every device to keep it going—fairs, strawberry festivals, oyster suppers, a donkey party, turkey banquets, Japanese weddings, mock marriages, and box socials. Will you please tell us, Mr. Greeley, what we can do to keep our struggling church from disappearing?"

### Starts Annual Patrol

The N. B. McLean, the biggest unit of the government icebreaking fleet, has sailed from here on her annual 5,000-mile patrol in Hudson Bay and strait. The ship, under Capt. W. J. Baloof, formerly of Halifax, will be away until October.

Visitor: "Your son is rather small for his age, isn't he?" Proud Mother: "Oh, no; most boys of his age are overgrown, I think."

Italy used safety pins 3,000 years ago.

### BLACKHEADS

Don't squeeze blackheads—dissolve them. Get two ounces of peroxide powder from any drug store and rub gently with wet, hot cloth over the blackheads. They simply dissolve and disappear by this safe and sure method. Have a Hollywood complexion.

### Trees For The Prairie

Since the program of work under the Prairie Rehabilitation Act was begun in 1935, a total of 960,440 trees have been supplied free for planting in the prairie provinces. District experiment sub-stations took 77,730 in 1935 and 1936; Agricultural improvement associations, 229,380, and field crops shelter belts associations 653,330. In addition, the regular free distribution of trees from Indian Head and Suburban nursery stations in 1935 and 1936 totalled 11,928,834. From 1901 to 1936, these two shelters have distributed free to farmers in the three prairie provinces over 150 million trees.

"I am grateful to you for the confidence you have reposed in me," cried the winning candidate.

"All right," said a voice in the rear, "but don't do any more reposing. Get busy."

It takes four to eight times as much soap to make a satisfactory cleansing lather when hard water is used than when soft water is available, depending on the degree of hardness of the water.

In comparison with human eyes, the eyes of most birds are telescopic. A small grain particle hardly distinguished by a person standing a yard away from it, is seen 100 yards by some birds.

### Multiplicity Of Duties

Royal Canadian Mounties In Northwest Territories Kept Busy

Wherever the scientist, explorer, prospector and prospector goes in the Northwest Territories he finds the Royal Canadian Mounted Police to help him. And he finds the Mounties represents just about a dozen kinds of officialdom.

A government statement dealing with the Northwest Territories discloses the information that "the prevention of lawlessness and apprehension of offenders are but a part of the multiplicity of duties performed by members of the force."

"They are entrusted also with enforcement of the Northwest Game Act, the Migratory Birds Convention Act and various other Dominion acts."

In certain circumstances they are called on to assume customs and immigration duties, to collect income taxes, accept applications for naturalization, act as postmasters, mining recorders or coroners; to issue timber permits, pay wolf and coyote bounties, register vital statistics, issue rations to destitute Eskimos and Indians and supervise liquor permits and importation of liquor.

All commissioned officers are justices of the peace and all ranks are commissioners for administering oaths. Sheriff of the Northwest Territories is Major-General Sir James H. MacBrien, commissioner of the R.C.M.P.

The force has men at 22 points. Along the Mackenzie basin they are stationed at Resolution, Providence, Simpson, Norman, Good Hope, Arctic Red River, Maitland and Aklavik. Scattered along the Arctic shore they are at Coppermine, Cambridge Bay, Cameron Bay, Fort Rae and on the patrol boat "St. Rose."

In the Slave River area is a station at Fort Smith, in the Hudson Bay area at Chesterfield and on McLeod Bay at Reliance. Farther east are posts at Port Burwell, Eskimo Point, Lake Harbor, Pangnirtung, Pond Inlet and Craig Harbor.

### Forfeits Crown For Love

Prince Charles Of Sweden Marries Countess Elsa Von Rosen, A Commoner

Prince Charles of Sweden sacrificed any chance of inheriting the throne when he married Countess Elsa von Rosen, a commoner.

The nephew of King Gustaf V. of Sweden and brother of the late Queen Astrid of the Belgians, lost his title and prerogatives in the Swedish royal family.

He acquired a new title, however, becoming by royal decree Prince Charles Bernadotte. His bride, daughter of the Swedish court master of ceremonies, became Princess Elsa.

Prince Charles was the third member of the Swedish royal family in recent years to forfeit his crown rights for love.

The new princess, seven years older than her 26-year-old husband, was divorced in 1935 from Agnes von Rosen. She has three children.

### Lonely Island Was Safer

Civilization Proved Too Much For Boy From Tristan Da Cunha

Civilization proved too much for the youth who left the loneliest island of the world. After less than a year in London he died.

Donald Glass was a direct descendant of William Glass who founded the settlement at Tristan da Cunha, in the South Atlantic, more than a century ago.

Donald left a happy life, where disease is virtually unknown, determined to succeed in the great world. He was accepted by the Boy Scouts who tried to make life for him something like that in the home from where he came, but they failed to consider the germ that afflict civilization. He fell ill and gradually declined.

### Job Was Thorough

Crude Operation By Amateur Surgeon Probably Saved Man's Life

A crude operation performed with a fishline and a net-mending needle appeared to have saved the life of a man badly torn by a rusty spike on lonely San Miguel Island.

Despite twelve days he spent tossing with pain when passing boats overlooked his distress signal, Robert L. Brooks, the injured man, was expected to survive.

Brooks, lessee of the windswept speck in the Channel Islands chain off Southern California, slipped while repairing a wharf two weeks ago and a spike ripped a gaping wound in his thigh.

San Miguel is without a doctor, a boat, or any means of communication with the mainland. No ship was due for weeks.

Realizing that Brooks would bleed to death unless the wound was closed, Herbert Lever, only man on the island, set to work. Lever, shell-shocked World War veteran, lives on San Miguel with his wife and two children, and works for Brooks.

He boiled a fishline and the needle he used to repair fish nets. While the injured man dug his nails into the bunk and gritted his teeth, Lever sewed up the wound without anaesthetic. He prayed while he sewed.

For twelve days no passing craft heeded their distress signal—the American flag flying upside down. Then the motorship Vacadero of Santa Barbara arrived four days ahead of time with supplies. It rushed Brooks ashore.

Physicians at Cottage Hospital said the amateur surgeon was so thorough that no infection developed.

### Selling Canada's Wheat

Publicity Campaign In Britain Planned With Care

The Canadian Wheat Board sends us a brochure containing handsome, printed reproductions of the material used in its United Kingdom advertising campaign.

The board says that so far as it knows this was "the first attempt which has been made by any wheat-exporting country to promote the sale of its wheat by advertising and publicity work."

The campaign was planned with great care. Advertisements designed for their respective fields were used in the newspapers of England, Scotland, Northern Ireland, emphasizing the advantages of Canadian hard wheat in the making of bread. At the same time a series of advertisements in trade journals was addressed to millers, bakers and retailers.

The Canadian Wheat Board, is dealing with a product of unexcelled quality, trying to increase its sale in the rich and concentrated market of the United Kingdom, and its campaign appears equal to the occasion.—Ottawa Journal.

### Was Infracted Of Law

Man Found His Neighbourly Act Cost Him Plenty

It cost George Thiesen of Mennon, Sask., just \$25 to be a good neighbor. He undertook to transport the band from this town, 25 miles northwest of Saskatoon, a few miles to a picnic recently but before he had done his good turn he met up with the law. He was fined in Royal Canadian Mounted Police court for infringement of the vehicles act by carrying passengers in a truck.

A motorist driving 45 miles an hour steadily for 10 hours a day would require 13 years, 10 months, and 21 days to travel over all the improved roads of the United States.

From here it is beginning to appear that trying to get rid of relief is much like trying to throw away a wad of chewing gum, says Judge.

Hamburg, Germany, has a population of more than 1,128,000.

"Wouldn't it be a joke if you was to peg out with only half yer blinlin' sentence done?"—Everybody's, London.

### Festival Date Changed

Set Back One Month When Delegates Met At Moose Jaw

Dates for the 1938 provincial music festival were set back a month as delegates from five provinces concluded the 12th annual conference of the Western Canada Music Festival Associations at Moose Jaw. Next year the Saskatchewan festivals at Saskatoon and Regina will take place the latest part of April, from April 25-30. At present, no definite arrangement has been made as to whether Regina or Saskatoon will conduct its festival first. So far, the old arrangement will be followed, whereby in 1938 Regina will be first, Saskatoon second.

In 1937, the festivals took place during the last week in May. Delegates were present from Saskatchewan, Manitoba, Alberta, British Columbia and Quebec.

Represented for the first time at the conference was the Quebec Musical Competition festival which held its first festival this year in Montreal. The organization was represented by R. Willis, Montreal.

Adjudicators for 1938 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wilson, London, who will also adjudicate vocal competitions.

Mr. Wilson is new to Canada, but Sir Hugh Robertson has been in the Dominion on several occasions as adjudicator. Mr. Jacobson has been here once before.

In 1939, the same three adjudicators who recently completed their tour of Canada will return to return: Dr. J. F. Stinton, George Dodds and Arthur Benjamin. Dates for festivals both in 1938 and 1939 were set recently, as delegates pushed through to completion in two days a session originally scheduled to last three days.

### SELECTED RECIPES

#### PICKLE RELISH

- 2 qts. cucumbers
  - 1 qt. onions
  - 1 large cauliflower or cabbage
  - 3 peppers, red or green
  - 1/2 gallon mild vinegar
  - 3 cups brown sugar
  - 2 cups Crown Brand Corn Syrup
  - 1/2 cup Benson's Corn Starch
  - 1/4 cup mustard
  - 1/4 teaspoon turmeric powder
  - 2 ozs. minced seed
  - 2 ozs. celery seed
- Method: Chop all vegetables fine. Let stand in brine overnight (1/4 cup salt to each quart water). Drain. Make a syrup of vinegar (reserving 1/4 cup for dressing), sugar and Crown Brand Corn Syrup; mix vegetable and let come to boil. Make dressing of Benson's Corn Starch, seasonings, spices and 1/4 cup cold vinegar. Stir into hot mixture. Again bring to the boil; seal in sterile jars. Makes 5 pints.

### Had Successful Year

Canada's Fishing Industry Showed Big Increase In 1936

Canada's fisheries in 1936 experienced the most successful year since 1930, the Dominion reported.

Value of production in 1936 was \$39,164,618, the total representing the value of fish as marketed, whether sold for consumption fresh or as canned, smoked, dried and other forms. It showed an increase over 1935, low year of the depression period, of \$13,207,509 or 51 per cent.

Total quantity of fish taken by Canadian fishermen during 1936 was 11,088,279 cwt., with a value at the point of landing of \$22,083,742, compared with a catch of 5,532,016 cwt. and a value of \$20,755,787 in 1935.

### Easy To Identify

When the police of Hermannus, South Africa, inspected the trail of a barefoot burglar, who had stolen \$100, the Sherlock Holmes instinct told them the capture should be easy. One of the big toes was peculiarly formed. All the well-known jail characters passed inspection, and the trail finally led to N. Cupido, an amateur burglar, who was sentenced to four months hard labor.

Moontlight has an intensity about one-fourth of a foot candle; bright sunlight at noon has an intensity of about 10,000 foot candles.

### Left Legacy For Poor

But Town In Scotland Has No People Who Qualify

There is a small town in Aberdeen-shire, Scotland, called Turiff, with a population of over 2,000, who are a very proud people. That is not to say they are conceited, or affect a lofty attitude toward other communities. The colloquial name for it is "Turra," and the locals have a slogan: "Tak awa Turra an' twal miles roon and whau are ye?" If you don't know what that means well interpret: "Take away Turiff and twelve miles around and what is left of the town is worth while?" That's the sort of people they are in "Turra." They regard their town and environs and the people within as the hub of humanity.

Turiff has really justification to boast though. Recently a native of the town died in New Zealand and bequeathed a bequest of \$25,000 for the poor of Turiff. That is where the Town Council is in a pickle. There are no poor in Turiff and the administrators cannot carry out the terms of the gift because there is nobody to give any part of the money to. Pending some solution, or the improbability that some of the local folks will go broke, the \$25,000 has been handed over to the custody of the County Council.

A place of that kind surely lives up to the distinction which it confers upon itself.—St. Thomas Times-Journal.

### A Modern Pastime

Many People Before Public Eye Receive Fan Mail

A writer in the New Yorker Guardian considers a trend of to-day that is new and astonishing in vesture—"fan mail."

"Thousands and thousands of these letters are posted every day. It began with actors and actresses, singers and other public entertainers who have for years received letters from their admirers, but as soon as the cinema became the chief medium of entertainment girls and boys, and principally girls began to write to the film stars and fan mail really began. Now it is not confined to film stars, but extends to prime ministers, as we heard from Stanley Baldwin. It extends to everyone who comes before the public eye, even to wrongdoers..."

"It is rarely, however, that any one speaks of his pastime. It is a private matter between himself and the adored one, for most of the letters are tributes of admiration."

### Accurate Information

Milwaukee Has Plan To Determine What Visitors Spend

H. B. Cowan, Jr., manager of the Examiner's circulation department is just back from attending a convention at Milwaukee and reports an interesting plan by which the Milwaukee Association of Commerce gets accurate information as to the extent of the expenditures made by visitors to the city. Every delegate to a convention receives a questionnaire which is asked to fill out showing where he stayed, what stores his chief purchases were made at and how much he spent on shelter, amusement and other things, the information to be regarded as strictly confidential.—Peterborough Examiner.

Argentina, Canada, China, Great Britain, India, the Netherlands, and the United States are the most important markets for German watches and clocks.

Berlin is now the third largest city in the world, next to New York and London.

The yearly average of forest fires in the United States is 4,700.

### for STIFFNESS

# Japan Rushes Troops To Scene of Conflict In Peiping Area

Tokyo.—Premier Prince Fumimaro Kono declared that while Japan will continue to press for peace in the Chinese crisis, the despatch of "adequate armed forces" to China was imperative.

Sending of troops into China, the premier said, "will force China to reflect."

He appealed to newspapers, financiers, political leaders and business men to assist Japan in carrying out a nationally-united policy in regard to the present crisis.

He said troops for service in China came not only from Manchukuo but from Korea and Japan proper.

The cabinet, rising from an emergency session, issued a communique indicating Japan was ready for all eventualities.

The war office issued a statement saying reports from the scene of conflict indicated the Chinese had complied with Japanese demands for withdrawal of their forces from the Yantung battleground. But it went on:

"In view of the bad faith repeatedly manifested by the Chinese we are sure we shall be betrayed if we place confidence in such verbal promises. Therefore we will keep strict vigilance until the agreement to withdraw is completely fulfilled."

Details of troop movements were not announced, although it was known units of the powerful Japanese army of occupation in Manchuria, called the Kwantung army, had reached Shanhaiwan, on the China-Manchukuo frontier, presumably en route to the Peiping zone.

Popular excitement was reflected in the feverish demand for newspaper extras which flooded the streets. Experienced observers said the Japanese public had not been so roused since 1931, when the army began its conquest of Manchuria.

Explaining his decisions, the government's communique said: "Two successive incidents in North China (clashes west of Peiping) appear part of a well laid plan by the Chinese who at present are despatching large forces to North China. In

spite of China's aggressive attitude Japan is still genuinely anxious to localize the affair in the interest of preserving peace in Asia and hopes that reconsideration of the situation by China can yet re-establish peace.

"What Japan seeks from China is apology for unwarranted attacks, reparation for the slain Japanese soldiers and suppression of all anti-Japanese movements."

Tokyo.—The Oriental trouble centre shifted swiftly from the Soviet Manchukuo frontier to Peiping, near Peiping where Chinese and Japanese troops were said to have clashed while the latter carried out secret midnight manoeuvres.

Numerous casualties on both sides were recounted in Japanese despatches reaching here, and it was said artillery, trench mortars and machine guns were used.

The scene was only 60 miles south of the Great China wall, and 12 miles from Peiping which could hear the reverberation of cannon fire.

A second fight was said to have followed the Fengtai battle, the latter clash at Lukowkiao.

## Home Improvement Plan

Mining Towns Set To Make The Best Use Of Loans

Toronto.—New Waterford, N.S., at present tops the list of communities with the highest per capita use of the home improvement plan, according to figures released here. The plan is under governmental sponsorship with co-operation of financial institutions.

New Waterford is a mining community and others like Nelson and Trail in British Columbia and Timmins, Ont., also stand high in the listing, but not by coincidence, according to the Toronto advisory committee. Mortgages, it was explained, are rarely available to property owners in mining towns as few companies are willing to run the risk of their becoming "ghost towns." As a consequence, the government loans are being snapped up by those wishing to make residential repairs.

# Premier King Gives Hopeful Picture Of European Politics

Quebec.—Returning from a two-months' visit to Great Britain, Prime Minister Mackenzie King landed from the liner Empress of Britain after giving interviewers a hopeful picture of European politics.

During his absence the prime minister, at the close of the imperial conference, visited France, Germany and Belgium. He would not comment upon his conversations with Chancellor Hitler and ruling heads of the other countries other than to say he had been well-received and had profited much. He intimated that other matters would be the subject of a radio broadcast.

The prime minister issued the following prepared statement:

I return to Canada much reassured as to the probable outcome of the conditions which have been and continue to be of great concern to us all. Despite every appearance to the contrary, I believe the nations of Europe have a better understanding of each other's problems to-day than they have had for some years past, and that, in their solution, they are prepared to co-operate to a greater degree than has been the case for some time. What is true of Europe in this particular, is true of the extension of trade, and co-operation in other matters, between the old world and the new.

It has come to be recognized that the policies of extreme nationalism, which have raised so many barriers to the free intercourse of nations, have outlived their day, and that what is required is less emphasis upon self-sufficiency and its consequent isolation of nations, and increased co-operative effort to solve problems, and to avoid perils, which are shared in common.

Within all countries, there is much in the way of social change. A new social order is gradually emerging; an order which ultimately will mean more in the new way of social justice in human relations. It is being worked out in different countries, varying greatly in method, as conditions and the temperaments of the peoples vary. Each country has its

own domestic problems and should be permitted to work them out in its own way.

There can be no greater mistake than for any one country to judge others by its own standards, unless it be that of trying to impose standards of its own upon others against their will.

What is most required to-day is an understanding of, rather than an emphasis upon differences, and a readiness, upon the part of all, to further the common good. It is going to take time to complete the transition through which all countries are passing, in the readjustments which are being made in the existing social order, but that they can be made, without adding international conflict on any appreciable scale to the difficulties which all have to face, I have not the least doubt.

I should hesitate, of course, to speak of countries other than those in which, during the course of my sojourn abroad, I have been privileged to enjoy exceptional opportunities for the discussion of public affairs; but of this I am certain, that neither the governments nor the peoples of any of these countries desire war, or view the possibility of war between each other as other than likely to end in self-destruction, and the destruction of European civilization itself.

The one danger common to all is that to which the prime minister of Great Britain recently directed attention, namely, that words too hastily used and too loudly expressed may, unless the utmost caution is followed, lead to some precipitate or unpremeditated act, the consequences of which none can foresee. Sensationalism and propaganda are to-day the common enemies of mankind.

If the peoples of the different countries will not permit themselves to be unduly swayed or prejudiced by either, and will seek rather to further every agency of international understanding, of friendship and good-will, we shall soon see an end to the suspicions and fears which, more than all else, threaten peace and impede progress to-day.

## Loyalists On Offensive

Spanish Government Troops Push Back Rebel Lines

Hendaye, Franco-Spanish Frontier.—Spanish government troops pushed ahead in one of the heaviest offensives of the civil war to shut in insurgent lines on the western side of Madrid.

Military sources at Irún confirmed government despatches insurgent lines in South Escorial had been broken. Government commanders threw 25,000 men against insurgent forces in the vicinity of Navalcarnero, a supply base and concentration point.

In Madrid the government announced Villanueva de la Canada, due west of the capital, had fallen before the assault of General Jose Miaja's troops.

Brumete, a key point nearby, was already in government hands, official despatches said, but the insurgent command denied Brumete had been occupied.

The sudden attack along the west central front, designed to lift the eight-month insurgent siege of Madrid, stretched on a zigzag line from Escorial, northwest of Madrid, to the region below Navalcarnero, southwest of the capital.

Generalissimo Francisco Franco's insurgent lines buckled and broke under the attack south of Escorial, government despatches said.

Insurgent sources admitted the sweeping offensive might necessitate withdrawal of insurgent forces from other fronts.

Government soldiers concentrated much of their attack on cutting a network of roads over which supplies have been sent to insurgents in the Casco de Campo and University City suburban sector of Madrid.

## Makes Test Flight

Connections For Yukon And Alaska Route, Via Edmonton And Montana

Edmonton.—Making a test flight over the route which will be used to ferry Yukon and Alaska air passengers from Edmonton to Montana on the inaugural flight of this service, W. Leigh Brintnell, head of Mackenzie Air Service, flew from Edmonton to Great Falls, Montana, and return, 1,000 miles. He made the 200-mile flight from Edmonton to Calgary in one hour and five minutes. Mr. Brintnell announced that as soon as delivery can be made, a twin-motored 200-miles-per-hour craft will be put into service on this route. The test flight was made in a small, speed Beechcraft. Landing in Edmonton, Brintnell completed the flight in 11 hours, including stopovers.

## Making Visit To Belfast

Portsmouth, England.—The veteran royal yacht Victoria and Albert will make her longest trip in many years when she conveys the king and queen to Belfast late this month. The last time she left the English Channel was in 1925, when King George V. and Queen Mary made a trip to the Mediterranean.

## ROOSEVELT BRIDE IN NUPITAL GOWN

Mrs. Franklin D. Roosevelt, Jr.

This charming camera study of Mrs. Franklin D. Roosevelt, Jr., the former Ethel DuPont, shows the bride in her wedding gown. Photo copyright Jay To Winburn.

## ATTORNEY-GENERAL

Gordon S. Wismer, K.C., prominent Vancouver lawyer, who has been appointed Attorney-General of British Columbia following the recent provincial elections in which the Liberal Government was successful. Mr. Wismer succeeds Hon. Gordon Sloan, who was recently appointed to the Appeal Court bench.

## Riders Are Injured

Chuck Wagon Race Brings Thrills At Calgary Stampede

Calgary.—Riders throng high in the air wagons splintered and broken and horses running wild brought thrills to the Calgary stampede crowd during the chuck wagon races.

Two riders were injured, and a third after being thrown 10 feet in the air when two chuck wagons collided, escaped injury.

Most seriously injured was George Emery, outsider for the Bremner outfit from De Winton, who was thrown into the path of onrushing wagons when his horse stumbled. He suffered internal injuries, hospital attendants reported. Jack Higgins, a driver from Big Valley, Alta., suffered a broken leg in the collision.

## Congestion In British Areas

Commission To Investigate The Distribution Of Population

London.—Prime Minister Chamberlain in the House of Commons announced appointment of a royal commission to investigate the causes influencing the present distribution of Great Britain's industrial population. It will also look into the probable direction of any future change in distribution and consider the disadvantages arising from concentration of industries in the big cities.

Sir Montague Barlow is chairman of the commission which has 12 other members, including two women.

Sir Montague was chairman of the royal commission on the Alberta coal industry in 1935 and is a former minister of labor and government representative at international labor conferences in Geneva.

# Great Britain Seeks A Solution Of The Spanish Civil War

London.—Great Britain, in her familiar role of conciliator, accepted an assignment by the 27-nation non-intervention committee to seek a solution to the impasse reached over the question of isolating the Spanish civil war.

Withdrawal of foreigners from both sides of the struggle will be the cardinal point around which British efforts will hinge, it was intimated as Foreign Secretary Eden began conferences with diplomatic representatives of the non-intervention nations.

The foreign office instructed its ambassadors and ministers in all European capitals to open inquiries with a compromise in mind.

The plenary session of the full committee was confronted with a new problem when Ambassador Charles Cogan, of France, intimated that unless the powers can agree on some formula, "beginning next week," France may throw open her Spanish border to passage of arms and men.

The gap in the neutrality naval patrol was created when Germany and Italy withdrew their warships from the international fleet.

Since then both these nations refused to agree to Anglo-French warships taking over the whole patrol. Britain and France rejected a German-Italian proposal to grant belligerent rights to both Spanish combatants.

Hopes the opposing stands could be reconciled developed upon British efforts. The assignment was suggested by Jonkheer A. C. de Graaf, Netherlands minister, and received unanimous approval. The Earl of Plymouth, chairman of the committee and a foreign under-secretary, accepted it on behalf of the British government.

Havas News Agency learned that in his acceptance Lord Plymouth said the British government stands ready to accept censure from no one for its policy in Spain, after Dino Grandi, Italian ambassador, said, according to Havas, that British warships had failed to prevent munitions-laden freighters from reaching Bilbao before the insurgents captured that Basque capital.

"Owing to the circumstances, the British patrols ended by protecting some of these ships," Havas quoted Grandi as stating.

The Associated Press stated that when the possible French step to open her frontier was first intimated it was pointed out that restoration of normal commercial relations with Spain would permit shipments of war materials to the Spanish government but not to the insurgents.

It was held France would be privileged to help a friendly neighbor subdue what she deemed a rebellion. Lord Plymouth asserted he would demand full co-operation from the 27 nations represented on the committee. He indicated another meeting would be called in a short time, possibly early next week.

The Soviet representative, Ambassador Ivan Maisky, supported Corbin's view non-intervention enforcement must be considered as an integral whole and that no plan was satisfactory which left loopholes.

Lord Plymouth said speeches such as Grandi's offered no positive contribution to the situation. He expressed personal approval of the French contention neutrality enforcement must be viewed as a whole, with marine supervision as an essential part of any effective system.

Lord Plymouth declared the British government "are not prepared to accept strictures of their conduct in this dispute from any quarters, since they consider them not deserved."

"If all the powers had observed the non-intervention agreement in letter and in spirit, as the United Kingdom government have done, the Spanish position would now be very different."

"His Majesty's government think that the withdrawal of volunteers is a matter of the very greatest importance because the presence of a large number of foreign volunteers in Spain undoubtedly has greatly aggravated the international situation and rendered a solution of the Spanish problem much more difficult, if not impossible."

"Having listened with care to the statements of all the representatives, there does seem to me to be a general desire that a way should be found out of the present difficulties, though I cannot feel that most of the speeches have contained any constructive solution. Certainly a very difficult situation has arisen at the moment."

"His Majesty's government are ready to examine sympathetically any proposal better than those so far put forward that might remove the difficulties now before the committee."

## De Valera To Carry On

Throws Down The Gauntlet To The Labor Opposition

Dublin.—President Eamon de Valera, who failed to get a majority in the Irish Free State elections for the dail (parliament) threw down the gauntlet to the Labor party. Defying the 13 Labor members to oppose him, the president declared in a statement:

"The flimsy fall (the government party) is satisfied that its policy was justified in practice and will not be diverted from it either to the right or to the left by any form of political pressure."

His new constitution will be in operation within six months, he said. Labor and the Fine Gael party opposed the constitution, but in the referendum taken in connection with the parliamentary elections it was approved by 569,635 to 452,692.

The new charter, De Valera said, will be the "fundamental law on which the whole political structure of our state will rest."

## Ancient Skeleton

Winnipeg.—The skeleton of an Indian who died some 2,000 years ago was found in a gravesite, 120 miles west of here, and is now in possession of the Manitoba Museum. Stuart Cridde, of Trebank, a museum director, investigated the grave five feet below the earth's surface and said the bones were well preserved.

# Says American People Favor Program Of World Peace

Charlottesville, Va.—Sumner Welles, under secretary of state, expressed belief that if nations overseas will undertake to find those political readjustments of inequalities which rose after the Great War, and in which he emphasized the United States, to part, the American people will overwhelmingly favor co-operation of their government in a broad program of world peace and rehabilitation.

In an address before the University of Virginia's Society of Public Affairs, Welles said the most immediate danger to the peace of the world lay in the conflict of "fundamentally antagonistic dogmas which men have evolved since the outbreak of the World War, which have had their genesis in want and misery, in a sense of injustice, social and national, in the belief on the part of peoples that through the realization of these concepts they may attain the remedy for the ills from which they have suffered."

Spain, he said, has become a battleground for these dogmas.

For bettering conditions he suggested:

1. The revitalization of international morals. "Which means first and foremost the sanctity of the pledged word given between nations."

2. Through the abolition, or reduction of all those innumerable artificial barriers to international trade which to-day exist, the restoration of peaceful trading interests between nations, thereby serving to give employment and to improve standards of living in all countries without disturbing in a significant way the organization of production in any country.

3. The limitation and eventual reduction of armaments.

4. Frequent conferences between representatives of governments, and free intercourse between their peoples, with free exchange of views and ideas."

THURSDAY, JULY 15, 1937.

**THE VACATION SEASON** is here. All who can are either enjoying a brief change from everyday routine or are contemplating going somewhere. New faces and new surroundings help to give interest to life and a change does everyone good.

**INSTEAD OF WRITING** and setting in type this column, we who are engaged in the production of this great family journal were tempted by a suggestion to go to the Castle River stampede, it being Wednesday afternoon. It meant either that and an afternoon amid the beauties of Beaver Mines district and the excitement of watching bronchos buck daring riders, or stay and do our duty. As this page would have had a blank appearance without something of local interest, we were compelled to stay home and work.

**WITH ALMOST** everyone in a vacation mood, which produces a lazy midsummer feeling, it is difficult to think up something of interest to write on. There is always a good old stand-by good for a column or more, and that is the fairy tale of Social Credit; but even harping on that becomes tiresome, now that everyone recognizes that the jig is up and that as a last resort a few jugglers from England and the United States will put the finishing touch on this deceptive comedy of trials and errors—mostly errors!

**RIGHT HERE** we have a mighty fine vacation land. But being so close to our own doorsteps, it is not appreciated at its value. People from the prairies and the crowded cities would appreciate two weeks in the mountains, while we who live here yearn for a touch of city life and new faces. It serves to show that variety truly is the spice of life. A rolling stone gathers no moss, its true, but then you can stay so long in a place that eventually you become a "mossback," unless you persistently struggle to keep out of the rut. Nobody likes being termed a "mossback," or a "hick," yet how easy it is to drift into that category.

**HAVING GOT** so far with the "kolyum," we are almost at a loss to proceed. But we must keep right on to the end of the allotted space. People as a rule during warm weather do not care about reading that which requires some thought, so we can assure them that this will not cause their brains to motivate more quickly than usual. Our own brain is somewhat lazy this fine summer afternoon, and our thoughts are away off in the hills, and looking at gleaming trout streams where we never caught any fish, rather than tapping the type-

writer keys. But like the boy who cried "Excelsior," we must keep right at it till the job is done.

**DURING JULY** and August the office staff take turns at holidays. There are few coming along with rush jobs of printing; advertisers are as lazy as anyone else; people slacken up in buying anything but the bare necessities; consequently the newspaper business takes a slump and we can either take holidays or clean up all the old type, stereotypes and other accumulations of a busy office. The junior member of the staff is taking his two weeks vacation, and by this time will be dodging the traffic lights of Vancouver or taking a dip in English Bay. Our fondest hope is that he arrives back safely with a fund of news experiences and startling stories to shake us out of our lethargy. Then we ourselves who are working this afternoon will be able to think of casting aside our duties and seek fresh pastures for a brief spell.

**YOUTH FINDS** a way of making its own pleasures. This we were reminded of in seeing young folks going to the swimming pool in West Coleman, where the river is not so swift and a diving board has been erected. Though the water may be cool coming from Crows Nest Lake, which never becomes warm, the boys and girls derive healthful pleasure from the resort of their own making. A few thousand dollars were spent on an artificial pool by a well-meaning group of people several years ago, but the natural pool offers more attraction and the artificial one has fallen into disuse. More recent comers to town may not know where it is. Unfortunately not sufficient thought was given to its location, and the money was apparently wasted, unless someone can organize a plan whereby its usefulness may be restored.

**AS WE** commenced this column with light and airy persiflage, we had better not flounder off into deep water or become serious. 'Tis not the time or the place, dear reader. The great outdoor calls, and we still have a hankering to go to the Castle River stampede, to see the "he men" wrestling steers and bareback riders do their dare-devil stunts. However, if we've filled the column, we will at least satisfy our conscience that we have done one of the things we ought to have done, even if we have left undone many others that we should have done. So that's that!

## Local News

Mrs. A. W. McLeod, Jessie and Roy are visiting with Mr. and Mrs. Herdman McLeod at Mercoal.

Mrs. J. L. Longbury, Mr. and Mrs. J. Nash, and Mrs. A. Easton motored to Lethbridge on Saturday to visit Mr. and Mrs. Ken. Blain.

Sam Peknik of Coleman and Miss Annie Borovec, daughter of Mr. and Mrs. Louis Borovec, of Bellevue, were married on Saturday at Blairmore by Rev. A. E. Larke.

Reader interest is the gauge of a newspaper's value as an advertising medium. The Journal is eagerly looked for. Its mission is to promote the general interest of the community in which it is published.

Mr. John Balloch and son Alex. left by motor on Sunday morning for Vancouver. They were accompanied as far as Trail, B.C., by Mr. and Mrs. John Ferguson, of Coalhurst. Miss Chrissie Ramage of Lethbridge will accompany the Ballochs to Vancouver.

Last Friday evening a forest fire broke out several miles west in British Columbia, giving off a dense cloud of smoke. By the following morning it had died down. Strict precautions will be necessary on the part of everyone frequenting the woods to avoid starting fires, as the ground is very dry.

with the

## A Nation-Wide Co-Operative Effort

The Home Improvement Plan of the Dominion Government is based on solid fact and sound finance reduced to their simplest and most workable terms. Recommended by the National Employment Commission, it faces a condition—unemployment—and meets it constructively, with a practical program that will gather momentum from itself. It contains nothing nebulous nor visionary. It is not a panacea nor is it an artificial relief measure.

### Purpose

The double purpose of the plan is improvement to Canadian homes and employment for Canadian workers. Every community has in it hundreds of homes on which little or no maintenance and improvement expenditures have been made in the past six years. The National Employment Commission has set itself the task of mobilizing across Canada a vast co-operative effort of home owners, workers, building contractors, building supplies firms, business and service organizations, and of public spirited citizens generally to restore and improve the homes of Canada and to draw the unemployed into remunerative and constructive employment.

### How the Plan Works

There are thousands of home owners whose homes need repairs and improvements and who have the savings to finance them. But, for those who have incomes but inadequate savings, the plan provides machinery whereby they can finance home improvements and additions, both interior and exterior, on most favourable terms. The plan enables the property owner to improve his property and increase its value without financial strain. He can go to his bank with every assurance of a sympathetic and helpful hearing. The bank will arrange for him a very cheap instalment plan. There is no red tape—the case is stated; assuming the applicant can satisfy the very fair and reasonable requirements, the loan is made. Decks are then cleared for the work to go forward at once.

### Work is Created

Every home improvement started PUTS MEN TO WORK—not only on the job itself but in manufacturing plants and dealers' stores throughout the country. Retail stores and the plants that supply them will directly benefit. Transportation companies will have more freight to haul. The farm, the mine and the forest will all react to the stimulated demand for the raw materials they supply.

The appeal of the plan is manifold. It appeals both to self-interest and to the community spirit. It appeals as a commonsense method of getting things done. It appeals as an economically sound stimulant to industry. It appeals as an immediate way of taking men off relief rolls and putting them on pay-rolls.

### A Background of Success

Wherever this plan has been tried, it has met with notable success. Homes have been brightened and made more livable, the unemployed have been put to legitimate work and the community has found itself lifted out of depression to a saner atmosphere of activity and contentment. In the City of Philadelphia, for instance, where \$21,000,000 were spent, over \$14,000,000 went to labour.

The interest of every Canadian citizen, as well as the national interest, dictates support of the Home Improvement Plan.

NOW IS THE TIME

BUILD

WHILE labor and building materials are still moderately priced you can build a home of your own and rest secure through the coming boom. Protect yourself and your family from rising rents and building costs.

REMODEL

WE will recommend only expert workmen, and supply first quality building materials to make your remodelling job one of lasting pride and satisfaction. Estimates and advice without obligation.

REPAIR

LEAKY roofs and other repair jobs are quickly and economically handled now that pleasant weather makes outside work easy. We will be glad to recommend competent, skilled workmen and to supply all needed materials.

DECORATE

PAINT and decorate with "SHERWIN-WILLIAMS" and "MONARCH" quality paints. They save you money because they spread evenly and go farther; and also because they give longer protection to your property.

WORLD HAPPENINGS  
BRIEFLY TOLD

Reserve championship for Peterson at the Calgary Exhibition was won by Konser, owned by Mitchell and Reith of Edmonton.

Harvard observatory has announced the discovery by Dr. P. Finlay, professor of mathematics at the University of Zurich, Switzerland, of a new comet of the sixth magnitude.

T. H. Bickle, son of Edward Bickle, Toronto broker, died by asphyxiation at the bottom of the St. Lawrence river while he worked in diving equipment attempting to recover an outboard motor.

Twenty-two more employees of the Soviet Far Eastern Railways have been executed as "agents of the Japanese intelligence service, spies and diversionists," Khabarovsk press agency reported.

Prime Minister Chamberlain has accepted an invitation to become honorary president of the League of Nations union, it became known, but coupled his acceptance with a strong warning the union must be strictly non-party in character.

A contract for the construction of an aircraft carrier as part of the 1937 naval building program has been awarded to Vickers-Armstrong, Ltd., of Barrow-in-Furness, the admiralty announced. The warship is to be named H.M.S. Indomitable.

Canada should have a coast-to-coast line of beams to safeguard air travel, Hugh B. Monaghan, past president of Hamilton Aero Club, said on his return from a trip to Moose Jaw via the air route. Radio was needed for safety, he said.

A homing pigeon, "Lady Churchill," released at The Pas, Man., May 18, has completed its flight home to San Antonio, Texas, a distance of 2,039 miles, a communication from Texas stated. The 43-day hop was considered by birdmen to constitute a world's record.

## Method Has Been Improved

Engines Oiled While Train Is Moving Means Increased Speed

Recent improvements in the methods of lubrication, to keep moving parts properly oiled while a train is in motion, enable locomotives to meet the growing demands for increased speed and extended runs. This was one of the developments described to the mechanical division of the Association of American Railroads in convention in Atlantic City.

Many locomotives now are equipped with mechanical lubricators which keep roller bearings, slide rods and other moving parts oiled adequately, thus avoiding wear and friction. Not only does this method reduce friction, but it also reduces terminal servicing of locomotives. Steam locomotives in numerous cases now operate on continuous runs of nearly 1,000 miles, while the passenger engines in certain railroads. Diesel locomotives operate on continuous runs in excess of 2,000 miles—Buffalo Courier-Express.

## Baulking The Auto Thief

New Style Of License Plate Designed For Drivers' Protection

A license plate intended to baulk the most wary auto thief by making him a mark for policemen or citizens as soon as he tries to slip away unnoticed in a stolen car has been invented by Messrs. Philip Parkes and Thomas Richardson, of Winnipeg.

When the car-owner parks his machine he pulls out a section of the plate, cut to slide easily into place against a riveted-on back piece of heavy tin, painted a glaring red. This leaves an incomplete plate with a red gap in it that says plainly: "I belong to a stolen car. Come and get me." A car thief cannot get far with the red spot showing. But the rightful owner of the car, returning to his parking place and finding his machine where he left it, merely slips the missing part back into place and goes on his way with a complete license.—Brockville Recorder and Times.

## Sodium Sulphate Production

The natural sodium sulphate industry is growing rapidly in Saskatchewan, having risen from 6,592 short tons in 1929 to 72,000 tons in 1936, according to "Canadian Finance". Sodium sulphate is used in the manufacture of craft paper, and in the smelting of nickel-copper ores. It is also used in the glass, dye and textile trades, and for medicinal and tanning purposes.

## Stamps Deplete Food Stocks

Official stamps depicting foodstuffs are issued by Liberia (pineapple), South Africa (orange tree), Ecuador (cocoa bean), Chile (potato), Liberia (pepper), Kedah (rice), and Mozambique (corn).

## ENTERS MINISTRY

British Columbia's first woman candidate for the ministry of the United Church is Miss Norah L. Hughes, graduate of the University of British Columbia, and lately an assistant in botany at the provincial university.

## Rusted Seed Wheat

Experiment Shows Germination Qualities Not Impaired

The use of rusted seed in certain experiments carried out by the field crop branch of the Saskatchewan department of agriculture in 1935 and 1936 suggested that this seed developed as well as the more expensive seeds used under similar conditions. S. H. Vigor, field crops representative of the provincial government, told members of the Western Canadian Society of Agronomy at the University of Saskatchewan.

The conditions under which the grain was seeded, Mr. Vigor said, were approximately normal. The rusted wheat germinated as well as the similar samples not rusted and the young plants seemed quite as healthy. Later in the season the crop was subjected to a prolonged drought and hot weather. The crop grown from rusted seed apparently stood up as well as the other crops in the same vicinity.

Other members of the group instanced similar experiments and found similar results. There was, however, no general conclusion to be drawn from the experiments so far carried out. It was believed that more experimental work might be necessary to conclusively prove the comparative value of the cheaper seed wheat.

Another matter respecting the influence of the rate of sowing on the development of weeds received some attention. Several members suggested that heavier seeding helped in the reduction of weeds in the crop and thus reduced the amount of dockage in the marketed crop.

## Factory Closed Many Years

Employer In Somerset Town Had Dispute With Labor

Twenty years ago one of the leading glove makers in Yeovil, Somerset, resented the demands of his employees, said "all right, I can do without you."

Within a few minutes his last instructions were obeyed. Work ceased and the great old engine which gave power to the glove machines petered out, men and women passed out through the doors for the last time. The factory had closed down.

Mr. Gould died, but the "ghost factory" remained closed—until recently when an army of workmen entered.

They found dust thick over floors and benches; the sewing machines rust-bound and choked, still with silks threaded through the needles.

With spade, brush and shovel, this large factory had its clean-up. A revival of industry in this busy town demands it. Floor space is urgently needed to cope with Yeovil's increasing trade.

## Not Very Grateful

In Kansas City a woman was knocked down by a car. Out popped Sir Walter Raleigh in the person of Johnny Karol, grocer. Sir John brushed the lady off, took her into his store, gave her a glass of water and inquired if there wasn't something else he could do for her.

"Well," she said, "I've got to see some groceries before I go home. Will you take me across the street to the chain store?"

First Guest—"What's holding the wedding up?"

Second guest—"Oh, the bride's father is a plumber and he forgot to bring her."

There are 800 theatres in New York City. Of these, 252 are legitimate theatres, the balance movie houses.

Occasionally a man gets so discouraged that he feels like writing poetry.

## For Exhibition Purposes

Surgical Operations On Dogs And Horses Should Be Prohibited

A Toronto magistrate dismissed a charge of cruelty to animals preferred against a veterinary surgeon who clipped a dog's ears and put a wooden frame on the animal's head to keep the mutilated ears in place. The evidence revealed that the dog had been in a fight with another dog and his ears had been so lacerated that it was necessary to perform surgical repairs. The erroneous impression was given that the ear-clipping process was for the purpose of preparing the dog for exhibition purposes. The magistrate remarked that if it had been established that the operation was merely to have the dog's head conform to certain showing fashions, his decision would have been different.

This case brings to recollection that there has been sharp disputes concerning show requirements in the cases of horses and dogs. It was the custom to dock the tails of horses in certain classes, for exhibition purposes, and it was also the custom to clip the ears of certain breeds of dogs and put them into a wooden frame so that they would stand up to give the animal an alert appearance.

These surgical operations were painful, there can be no doubt about that; but showing fashions are immutable, like the laws of the Medes and Persians. However, many humane persons do not think much of these modes for dogs' ears and horses' tails. They are sufficiently normal to believe that it is hard to improve on nature when it comes to appearance, in the case of all animals. Horses and dogs, who are the faithful servants and companions of human beings, ought not to be subjected to unnecessary pain just because someone has thought of a freakish fashion. The way to cure this idea is to clip the ears of exhibitors and put them in wooden frames until they heal. One experiment of that kind would end any inclination to try it out on the dog.—Woodstock Sentinel-Review.

## Woman Has Strange Pets

Wife Of British Consul In Detroit Devoted To Snakes

Additions to the exhibits at the new Detroit Insect Zoo in Convention Hall included three snakes loaned by Mrs. L. C. Hughes-Hallett, wife of the British Consul in Detroit, who finds that snakes make "marvelous pets."

Mrs. Hughes-Hallett lent to the zoo an Arizona bull snake, a California bull snake and a pilot black snake caught near Athol, Mich.

"Snakes are not just a hobby with me," Mrs. Hughes-Hallett said. "I am devoted to them and they are devoted to me."

She acquired a fondness for the creatures in India, where she was born, she said, and has caught, raised and trained them since she was a small girl. She is delighted particularly by their responsiveness after brief training.

"The California bull snake, which I have had for more than two years, would sit for hours in front of my chair without moving," she said. "I became very fond of it, even taking it for automobile rides."

France is getting a law to abolish tipping. Next in order is law regulating the tides and the sunsets.

## ELIZABETH TRIMS A COURTIER'S BEARD

An amusing episode in the Pageant of Surrey being performed this summer in London as an aid to hospital charities, Elizabeth of York is helping a courtier to make up for his part in the pageant by trimming his beard.

## MAKE THIS MODEL AT HOME—SLIMMING FROM A STYLE LEADER

By Anne Adams

You're going to shine in Summer's Fashion Parade when you don this lovely afternoon frock, an Anne Adams "charmer," that seems to melt pounds from your figure and bestow upon you those slender, graceful lines you've been longing for! Club-meetings, tea or bride parties—all your varied afternoon festivities will demand just such a flatterer as Pattern 4451, a joy to behold made up in a flower-splashed synthetic, shadowy sheer chiffon, or inexpensive printed voile. Don't you just love the brief sleeves, dainty bow-accented yoke, V-neckline, and gracefully flared skirt? Send for the easy pattern, and start your frock immediately!

Pattern 4451 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards 39 inch fabric. Illustrated Step-by-Step Sewing Instructions included. Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

## Dogs Are Disease Carriers

New York Society Would Bar Them From City

Formation of a society to bring about the complete banishment of dogs from New York City is announced.

The sponsors, describing themselves as dog lovers who felt that the animal would be better off in the country or suburbs, declared that, though lovable in some respects, dogs were the city's worst disease distributor. The organization is tentatively called the Animal Welfare Society.

Hawaii produces about 216,000,000 cans of pineapple annually. Placed side by side, these cans would reach halfway around the world.

Increased living costs is becoming a serious problem in Bolivia.

## SUNDAY SCHOOL LESSON

JULY-18

## GOD ENCOURAGES A LEADER

Golden text: The Lord will give strength unto his people. Psalm 29: 11.

Lesson: Exodus 3:15-6:1.

Devotional reading: Isaiah 6:1-8.

## Explanations And Comments

The Source of Help, Exodus 3:15-16. Moses is thinking his mission through. He sees himself trying to arouse his people by telling them that the God of their fathers has sent him to free them. Will they accept him as their divinely appointed leader. He fears not "Who made thee a prince and a judge over us?" had been their angry question forty years before when he had taken up their cause against the Egyptians. They will again question his authority. "What is his name?" they will ask concerning "the God of your fathers," for they may have drifted far away from that ancestral faith. How could he convince them of the nature of God?

And God said unto Moses, I AM THAT I AM. The margin of the Revised Version gives three alternative renderings: "I AM WHO I AM," and "I WILL BE WHAT I WILL BE." Moses, this is my title for all ages. "Say unto the children of Israel," God said to Moses. "I AM hath sent me unto you," and moreover, "Jehovah, the God of your fathers, the God of Abraham, the God of Isaac, and the God of Jacob, hath sent me unto you: this is my name for ever, and this is my memorial unto all generations." "This is my name for all times, this is my title for all ages" (Moffatt's translation).

The Return to Egypt: The Meeting of Moses and Aaron, Exodus 4:18-31. Moses took leave of Jethro, his father-in-law, and with his wife and sons started for Egypt, and his brother Aaron met him in the desert. In Goshen they appeared together before the children of Israel and told them what God had assured them they must do. The people believed their brother, and bowed their heads and worshipped him.

## Goes To Greenland

Dr. Forslid, Of Ottawa, To Visit His Relations In Far North

Dr. A. E. Forslid, now a botanist in the National Museum of Canada, is leaving for Godhavn, North Greenland, to visit his parents, Dr. and Mrs. Morten Forslid. His father, director of the Danish scientific station, Godhavn, has twice visited Ottawa, but Dr. A. E. Forslid has not seen his mother or sister for at least 12 years.

The Canadian Government scientist is sailing to the Far North with Captain Robert (Bob) Bartlett on the schooner Morrissey. Bartlett is headed for Smith Sound between Greenland and Ellesmere Island, but will stop off at Godhavn to enable Dr. Forslid to join his family. He will pick him up again two months later.

Dr. A. E. Forslid was in the headlines on many occasions in connection with the reindeer drive from Alaska to the Mackenzie district of the North West Territories. He made an investigation of the grazing possibilities of the Mackenzie district and later superintended the arrival of the herd, lecturing on his adventures before the Royal Geographical Society.

## Want To Solve Puzzle

How El Turns Food Into Electricity Problem For Scientists

How would an el turn its dinner of fresh fish into electricity? Two scientists who just returned from Brazil after spending two months studying the electric eel are looking for the answer. The electric eel is said to be part fish and part power plant. "We kept a careful record of electrical discharges of 27 eels," one scientist reported, "and we found that the smallest eel—only eight inches in length—gave off a regular impulse of not less than 110 volts. The most potent discharges recorded were one of 50 volts from an eel about a yard in length." Indians dwelling along the shores where the eels are found fear the high tension creatures as much as any beast of the jungle.—Peterborough Examiner.

## A Profitable Business

Newly-wed couple in Munich who purchased 18 different bedroom suites, are now spending their honeymoon in prison. Through Hitler's "aid to newly-weds" plan, they obtained special coupons to enable them to get furniture on the hire-purchase system. Before they were caught they had sold their 17 surplus suites, realizing about \$20,000.

## Furced To Use Concrete

In the midst of a great construction boom, Argentina is faced with a serious shortage of iron and steel. Recently the government, which approved an extensive building program including the erection of several steel structures for departmental buildings, has changed its plans and will now use reinforced concrete instead.

## ARTICLE No. 1

## PREVALENCE OF CANCER

Cancer is rather prevalent all over the world. Knowledge of this fact causes uneasiness in the minds of some middle-aged persons. But cancer is not nearly so prevalent as heart disease and few persons know any sleep over the thought that they may die from heart disease.

Statistics are quoted to show how rapidly cancer is increasing. The figures published by statisticians, who reveal in figures, would lead one to think that cancer is increasing very rapidly. In spite of this, one doubts if there is any considerable increase of cancer cases from year to year.

Much of the apparent increase is due to greater skill of doctors in finding cases of cancer; to the better records of mortality in the last generation and to greater knowledge of disease among the people themselves.

Moreover, people of the present generation are living longer than those of former generations. Fifteen years on the average have been added to the life of man since 1900. Since cancer is a disease chiefly of middle life and after, the longer people live the greater the opportunity there is for them to develop cancer. Ninety per cent. of all cancers occur after 35 years. The prevalence of cancer, while serious enough, need not unnecessarily alarm the public.

Even at this cancer is a serious malady. It stands second in the list of the "killing" diseases. In the last 30 years cancer has displaced tuberculosis for the second position. The affections which Canada between 10,000 and 11,000 lives each year.

Countries with a higher average age in its population appear to have more cancer, judging by the death rates, than countries where this average age is lower. Britain and the continental countries of Europe, have, for this reason, more cancer than young countries like Canada, where the ages of the people are on the whole lower. Similarly, there is, for the same reason, more cancer in the older provinces than there is in the prairie provinces. The latter's population is on the average younger than that of the Maritimes, Ontario, Quebec and British Columbia. As our country gets older, more cancer in the population assumes a higher average age, the incidence of cancer is likely to increase.

Article No. 2 will be "What Is Cancer?"

## Good Place To Live

Helsingfors Will Not Allow Noise At Any Time

Angora, which has just issued a decree prohibiting unnecessary noises in the streets, has nothing on the city of Helsingfors in the matter of quietness. In the big Finnish seaport, motor horns and sirens are banned, there is a similar veto of tramcar bells and ships' hooters, newboys are forbidden to shout, hawkers have to peddle their wares sotto voce while even street corner orators are compelled to speak indoors. As a result a sort of Sabbatarian calm prevails at the bustling hours, and profoundly impresses the average visitor.—Glasgow Bulletin.

## Poison Snakes For Zoo

Travel In Separate Boxes From Calcutta To London

Sinister arrivals at the London zoo are eight Indian banded krait and seven Russell's vipers, among the deadliest poison snakes in existence. The newcomers to the reptile house, travelled all the way from Calcutta, each in a separate box. They needed no food during their long voyage, but had periodically to be sprinkled with water through the perforated lids of their cases.

## Airplane Fowls

"Say," said the woman customer over the telephone, "the next time I order chicken, don't send me any more airplane fowls."

"What do you mean—airplane fowls?" asked the butcher.

"You know what I mean! All wings and machinery and no body."

Beaver dams were important and helpful in controlling erosion in this country before man's arrival.

## THE YELLOW BRIAR

A Story of the Irish on the  
Canadian Countryside

By PATRICK SLATER  
By arrangement with Thomas  
Allen, Publisher, Toronto.

### CHAPTER VIII.—Continued

"Cross your heart, Paddy, are there faeries?" the child asked me. "I'll not be denying them," I told her, "or the little people might let me fall down and hurt myself."

"Why, Betty," I went on earnestly, "the world would get along at all without the faeries. It's the faeries that keep the little birds and bees from getting lost. It's a faery that teaches a little calf to hunt and wag its tail in order to find the milk. Come down with me," said I, "and I'll show you the faeries at their work."

As we entered the stable door, the swallows were skimming in and out from their clay nest stuck on the ceiling beams.

"Just look at that," said I, "it's Irish faeries that taught the birds to build their neat clay cabins up where everything is safe and dry."

"Oh," Betty questioned, "but the swallows always did that?"

"Oh no!" I told her, "they couldn't do that till the Irish came into the country and built the stables for them. And, of course," I proceeded, "the faeries we brought with us from Ireland knew all about mud cabins and such like..."

The old sow, Sally, had farrowed that morning, and I had just left her sprawled contentedly on her flank, with a mass of squirming black sucklings pulling at her dugs.

"Just look, Betty, at the faeries teaching the little pigs how to get their bellies full of milk," I told the child.

"Oh! Dad, how many are there?" she exclaimed, as she hoisted herself on the side of the pen.

"Twelve," said I, "and a runt. And each one knows off-hand his own proper drinking place, and watch him fight for it. Now that," said I, "must be the work of the faeries."

"Why, Betty," said I, "you wouldn't be denying your own little faery? She comes to you when you are all asleep, and tells you you are a beautiful girl, and makes you feel sorry."

"Well," Betty confided to me, "I never right heard her talking, Paddy, but I do feel her whispering to me..."

"There you are," said I, "your own tiny pixy may be too small to be seen, but she's round with you all the time, is your little Colleen Rue. Just leave old Sarah Duncan to mind babies," I told her, "and come to Paddy Slater for reliable information about the little people."

Time flew by like a bird on the wing. In the spring of 1850, Bob O'Neil Pitsligo came to the Marshall farm in Mono; and he stole away from me the heart of young Charlie Marshall. Two seemed company for them—but three a crowd. Bob was a black collier with tan markings and the white collar on his neck stood out like the ruff on Queen Elizabeth in the old history book. He was a collier pup of high degree, with but one year to his credit; but, as for seeing the world, the young dog could do some stout boasting. The best blood of Scotland, ye ken, flowed in his veins. James Duffus had brought the young dog out with him that spring from New Pitsligo, in Aberdeenshire; but the Scotman tired quickly of farm conditions in the colony, and, on returning to Scotland that fall, Duffus had given

the dog and the boy to one another because of the warm attachment that had grown up between them. It was a fast friendship that lasted till death parted them. The two were chums who knew no quarrelling; there was never anything between them to forgive or forget. Of course, the normal lifetime of a dog is but a brief space. He reaches maturity at eighteen months; at which time he has got his learning and his habits are formed; and the infirmities of old age creep upon him as the teeth wear.

I say little as to what has come out of Aberdeenshire; because I find the Highland Scots well able to blow their own horns. Even their oats, they'll tell you, have more heft and are more nutritious than the chaff-like things we grow hereabouts. Yet it is a thing out of the ordinary, I'll admit, that the best beef cattle in the world, the Shorthorn and the Angus, were bred up to perfection in a rough shire that can also boast good dogs and many bonnie women.

Exact fire chieftain, the milkmaid and 'durna be disputed'.

The Scotch collier was the dog of the Highland shepherd; and a pure, honest cell was he. For centuries, his forebears held a gentle dominion over the timid, black-faced sheep in the great, insurmountable, hairy-legged creature who was helpless and forlorn without him. Even on the Lord's Day, the Scotch collier took his shepherd to church; and he had the decency to put off private affairs and dog fighting until the psalms were read, and the benediction said. Centuries of such intimate, personal, working contact with dour shepherds, in a great quiet world of flocks and winds, subjected the young of the collier breed to a slow, stern process of selection under which the wildest and the wayward died on the lonely heath, and did not live long enough to reproduce their kind. If a collier bitch let her love fancy wander to another type, it was a pitiless world that faced her mongrel brood.

And the body of the Scotch collier, and his mind also, are the result of centuries of training. In eastern lands, the sheep follow the shepherd's rod and staff; on the Scottish Highlands, great flocks roamed leisurely over rough, broken pastures; and the sheep were guarded by the wiles and the cunning of the shepherd's dog.

Bob's body was built to answer the needs of such a life of service. His ears were small and erect, save when he was listening to the whistles and whistles of the shepherd's dog, the shepherd's dog was fleet on his way, and swift as a flash of light.

His small, keen, sharp eyes, set slightly oblique on a long pointed skull, followed his master's signals from afar.

One would have to renew within himself the heart of his childhood to realize the thrill it gave Charlie Marshall, a quiet-spoken, barefoot boy of ten, to have as his first, and as his special and very own possession, a big, fun-loving, brown-eyed dog like Bob.

There was a riot in their play; and a noisy clamor on the tricks they put over on one another. While the pup pretended to be keen on a bone or busy about affairs of his own, Charlie would make speedy tracks to the barn and, leaning up the ladder, slip through an opening in the loft and down a rope to find a hiding place behind some stump or boulder. Off Bob would then dart, his face beaming with excitement, to work out the problem of the broken trap with a joyous bound to spring upon the fugitive, pulling at the boy's pants and poking a long, wet snout into his hugs. A trail broken by wading up the creek was a smart trick; but Bob solved it. It strikes me that what a dog once learns he never forgets.

Charlie and his dog proved a useful pair about the Marshall farm. It had been the boy's job to bring the milk cows home; and, in some seasons, that had been quite a feat, for the little lad, because the cows wandered far to find green pickings in sheltered, hidden places. But Bob now went with him, which made it a simple and pleasant matter.

One Saturday afternoon, Charlie slipped off a beam in the barn, and his ankle was badly sprained in the fall. This caused a delay in the cow-broking job; but not to leave things in a lurch like that, the dog quietly went back to the barn and brought the cows up on his own.

So, of course, said you to infer that the dog was doing any thinking; he may have been an automaton guided by some blind instinct. But an interesting point is that Bob did not bring up all the cattle. He did not bother him with the Buck and Bright, nor the other young stock.

No! Bob just brought up the cows that required milking. And after that the collier made it a practice of going for the cows himself; and night and morning, and right on the clock, the string of sedate matrons would slowly into the stable yard. And the dog made it a friendly, leisurely business. As you know, a milch cow's nerves should be calm and restful at the milking time, because she actually makes the milk while one expresses it from her. Unless she is cross, a mild, patient and sane humor, her milk glands become stung with their secretions. Bob saw to it that there was no dogging of the Marshall cows.

One morning, Bob brought up an excited roan heifer to the milking yard.

Marshall smiled.

"So, Bobbie, you think Flossie'll be needing the milking too. If you'll help me, we'll just slip her into the stable, and after she gets a bit more impatient, we'll follow her down and find her calf."

It was a highly excited heifer that was let out, after what seemed a long wait, to run bawling down the lane toward the bush where her treasure lay hidden. But it took became apparent to Marshall that the young mother had no notion of leading the two brutes to the hiding place of her precious, little, saucer-eyed calf. She was on to their tricks; and time was not the essence so far as she was concerned. Not let that wicked man run his legs off chasing a loving mother over fallen trees in accessible gulches!

And a pale-faced human makes a poor first of finding anything in unbroken timber lands. He has only his ears and eyes to guide his quest. And a young cow, who has gone wild at calving time, hides a calf that crouches mute and still as a granite boulder until hands actually laid on its body prove that the game is up.

(To Be Continued)

### Gathering The Ship-News

Not As Exciting As It Was Before  
Radio Was Used

One day in a recent week, thirty-nine passenger-ships were announced to arrive in New York harbor. The British Ship-News, a London publication, is the official newspaper of the Royal Canadian Mounted Police. It is the only newspaper in the world that carries news of the ships of the world. The ship-News is a daily publication, and it is the only newspaper in the world that carries news of the ships of the world.

The ship-News is a daily publication, and it is the only newspaper in the world that carries news of the ships of the world. The ship-News is a daily publication, and it is the only newspaper in the world that carries news of the ships of the world.

Heading the delegation was T. Walter ("Skipper") Williams, of the New York Times, dean of Gotham's water-front corps of reporters. A native of England, now in his sixties, "Skipper" has finished his 32nd year of active service. He says he's seen them all come and go, but that covering ships isn't what it used to be.

"The personal touch is gone," he laments.

Once upon a time, tugboats would put out from the New Jersey coast. They would approach incoming vessels and have dispatches thrown down. These, in turn, would be telegraphed from the Jersey coast.

"But with the radio, news comes and cables the news is old before we even get to it," Williams said. "The real old-time ship-news reporting went out when Marconi came in."

The "Skipper" plunged into work as soon as he returned from (his 14th crossing) the Coronation and the opening of the Exposition in Paris. Emphatically he denied the statement that he disapproved of Miss Dixie Tighe of the New York Post, first and only woman ever to cover ships in New York. He says he merely is fearful that women will get hurt clambering up the sides of ships.

### Determine Age Of Fish

Growth Of Rings On Scales Give Scientists Clue

Microscopic analysis, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriam, graduate student in zoology at Yale University, is completing an extensive study of the growth rings on bass at the mouth of the Niantic river in Connecticut, and has found that the rings correspond to the growth rings of trees. Studies under a microscope, he said, will reveal the age of the fish, the rate of growth and whether it goes south in winter.

A Vienna barber won a contest by shaving a man in 18 seconds. The customer should get a medal for bravery.

### Was Once A Hospital

St. James's Palace Has Special Place Among Royal Estates

As the scene of several marriages and christenings within the Royal family, St. James's Palace has a special place among the royal estates of King George and Queen Elizabeth.

Originally the palace was a hospital "for fourteen maidens that were leprous" until that acquisitive monarch, Henry VIII., converted the building into a hunting lodge. From this time dates the Gatehouse, which to-day presents the most favorable aspect of the approach to the Palace. Most of the children of the ill-fated Charles I. were born at St. James's, and it was from there that he walked across the park to his execution in Whitehall. William IV. was the last monarch to make this castle his principal residence.

The present King's father and mother, George V. and Queen Mother Mary, were married in the Chapel Royal of St. James's which still preserves the ceiling attributed to Holbein, a masterpiece of art. George and Mary were married in this chapel in 1893.

Queen Victoria was married there in 1840, and the future German Emperor and Empress Frederick (daughter of Victoria) in 1858. The few of the historic buildings of the Empire's capital kept the eye with more charming effect than does St. James's Palace. With its octagonal towers of mellow brick, its multicolored windows and quaint carvings it takes the beholder into the times of the Tudors.

Although St. James's has long ceased to be a residence for the sovereign, the Royal leaves are still held in it, and within its quiet precincts reside several members of the Royal family. Many Canadians will recall waiting upon the former Prince of Wales, who for many years has his quarters at York House, St. James's.

The State apartments in recent years have not only been used for ceremonial occasions such as levees, but have also served to accommodate gatherings of Imperial moment like the India Conference. From the windows of the old presence chamber the new sovereign is still proclaimed on his accession. The magnificent fireplace bears the initials of Henry VIII. and Anne Boleyn.

### Mysteries Of Ocean Currents

Boat Drifts From Arctic Ocean To The Bay Of Biscay

A buoy cast into the Laptev Sea (in the Arctic) by the ice-breaker Sibirskyak during her voyage from Archangel to the Pacific in 1932 has been picked up in the Bay of Biscay, near the French coast, and sent to the All-Union Arctic Institute at Leningrad. It is estimated that the buoy must have travelled more than 4,800 miles, said Professor V. Y. Voevodskiy of the opinion that it drifted from the Laptev Sea to the Polar basin north of Franz Josef Land, then down the East Greenland current to the southernmost promontory of Greenland before reaching the Bay of Biscay—London Times.

### Canadians Eat More Pork

Has Now Supplanted Beef As The Favorite Meat

Pork is the favorite meat on the Canadian menu. Figures published by the Dominion bureau of statistics on meat and dairy products consumption during 1936 show pork has supplanted beef.

Beef and veal consumption fell from 723,679,000 pounds in 1935 to 655,390,000 in 1936 while pork jumped to 745,005,000 pounds from 678,070,000.

More chickens went into pot and roasting pan, but demand for turkeys, geese and ducks fell off. Butter consumption has increased steadily in the past four years.

Natives of Tristan da Cunha, a tiny island of the South Atlantic, have never owned tooth brushes, but 84 per cent. of them have perfect teeth.

"When the Battle of Trafalgar was fought the papers did not give much space to the first reports," says a historian. But Lord Nelson got a column.

London spends \$40,000,000 a year on its police force.

### Youth Of Canada

Former McGill University Principal Has Words Of Praise

According to Professor A. E. Morgan, former principal of McGill University, Montreal, modern university youth of Canada constitute "one of the very striking assets of Canada."

"In the universities one sees the best examples of those who are going to be the leaders of Canada tomorrow," said Prof. Morgan, who has just returned to Great Britain. He declined to make any comment upon his resignation as principal of McGill. He said he had no definite plans for the future beyond taking a holiday.

"If one dared to generalize, one would say that the youth of Canada is less sophisticated and more optimistic than the youth of Great Britain," said Prof. Morgan.

"This does not mean that conditions have been easy for him. Emphatically, they have not, and the unemployment of youth has been very serious. But their spirits do not seem to have been dampened and one falls to find evidence of cynicism."

Discussing the province, the principal of McGill said "the province is in some ways the most reactionary part of Canada. At the same time, it is a stronghold of the older cultures, both French and English. In that respect it makes a great contribution to the Dominion as a whole both as the leaven and a steadying influence."

### Started Him On Career

Unpleasant Experience Set Newspaper Man's Feet On Writing Trail

Frank Cullen, 72, whose literary career began when a bunch of thirty Indians dumped him ungraciously atop a stove, is dead.

He had been on the Montreal Star's staff for 40 years, and many a time in that period he had set young reeds on the writing trail, and he wrote of how he became a writer man. It happened on the western prairies, when he was in charge of an isolated telegraph station.

Indians were about his only companions at the lonely post. One night, he passed around a bottle of "fire water." The redskins soon drank it, and asked for more. None forthcoming, they sat their host on the office stove and threatened to light the fire unless he found some.

Persuasive argument got him out of the predicament, though, and soon after he capitalized on the incident to win a \$50 prize offered by a London periodical in a personal adventure story contest. That set his foot on the writing trail, and he wrote plays, novels and short stories from then on, besides his newspaper work. He was a native of Kendal, England.

A very thin man met a very fat man in the hotel corridor. "From the look of you," said the latter, "there might have been a famine."

"Yes," was the reply, "and from the look of you, you might have caused it."

The average human body loses weight at the rate of one pound every eight hours by evaporation of moisture through the lungs and the pores, and through exercise.

The World War added 6,000 new words to the English language.

## A REVOLUTION IN THE KITCHEN

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out a sheet at a time. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

At grocers, druggists, stationers and departmental stores.

## FORMER ATHLETE ALMOST A CRIPPLE

### Now "Right As Rain" After Taking Kruschen

Read this letter from an athlete, telling how he obtained relief from rheumatic pains:—

"My knees were so stiff with a kind of rheumatoid trouble that I could only rise from a chair with pain and difficulty. They were growing worse and worse for about two years. It was all the more galling because in my young days I had played for two counties at football and held my college record for the 100 and 220 yards. Naturally I tried all sorts of embrocation, but with absolutely no perceptible effect. Then I decided to try Kruschen Salt, and to cut a long story short, I am now as right as rain."—W.S.T.

The pains and stiffness of rheumatism are frequently due to deposits of uric acid in the muscles and joints. Kruschen helps to stimulate the excretory organs to healthy, regular activity, and so enables them to eliminate this excess acid from the system.

### Little Helps For This Week

One thing have I desired of the Lord, that will I seek after, that I may dwell in the house of the Lord forever, to behold the beauty of the Lord and to inquire in His temple. Psalm 27:4.

Thou art the Temple, and though I am lame, Late from my birth, and shall be till I die, I enter through the Gate called Beautiful.

And alone with Thee, O Thou Most High.

Consider that all which appears beautiful outwardly is solely derived from the invisible spirit which is the source of that outward beauty. These are streams from the uncreated Fountain, drops from the infinite Ocean of all good. Our hearts should rejoice at the thought of that eternal Infinite Beauty which is the source and origin of all created beauty.

### Not Particularly Helpful

Man Received No Assistance From Secretary Of Client

Arriving in New York on a business trip a gentleman was invited to dine at the house of one of his clients. He forgot to ask how formal the meal was to be, so when he went back to his hotel to dress he called the client's office, and finally got through to his secretary. "I'm going to dinner at Mr. J.'s house," he said, "and I want to know whether to wear a white or a black tie."

"That all depends," she said brightly, "on whether you are going to wear tails or a dinner jacket."—The New Yorker.

Railway Electrification In Sweden

Completion of electrification of 602 kilometers of railway lines in Sweden this year will bring the total electrified mileage to 2,549 kilometers, 35 per cent. of all lines belonging to the state railways, carrying 70 per cent. of the traffic.

Wheat has been planted on 32,167,000 acres in India this year, and good crop is expected.

## Local News

Bert Collicut, formerly of Edmonton and Wetsaskwin, has opened a barber shop in the Ferrara building, Main street west.

John Rushton has moved his stock from the building in which he has been for over ten years into the new building owned by A. E. Knowles. Coleman Hardware Co. will utilize the space vacated by Mr. Rushton.

For the week-end "The Hit Parade" at the Palace brings your favorites of the radio and the screen's brightest names in a sparkling entertainment of high-powered humor, gorgeous girls, tantalizing tunes. Hear Carl Huff and "The Hit Parade" orchestra.

Stopping off for a few minutes while enroute from the coast to Weyburn, Saskatchewan, a Mr. Ring saw some attractive cups and saucers in the window of Webster's store. So eager was he to purchase a set that he got Mr. Webster to come from the picture show to serve him.

Another name added to our honor roll of subscribers this week is that of Mrs. Chris Rogers, who paid her seventeenth annual subscription since The Journal was established in 1921. There were earlier weekly papers in Coleman, namely The Miner and The Bulletin, but The Journal has endured the longest of any of them.

Yesterday one of the Greyhound busses met with an accident on the Moyie hill, but fortunately the passengers and driver escaped unhurt. The three busses were going west and running not far apart. The bus in the centre apparently became befuddled in the dust raised by the other two and got off the road and toppled over on its side. A gang of the General Construction company happened to be working close by and assisted in getting the bus back on the highway.—Cranbrook Courier.

There are many imitations of printed matter produced under sweatshop conditions and seah methods, always undercutting those who try and maintain a decent standard of wages and meet their bills. Such individuals we have found resort to knocking competitors in order to secure business, even to the extent of overstepping the truth. Scams, pirates, bedroom printers, there is a flock of them of all types who never trained for the job, who carry no trade organization membership, who are just leeches on the legitimate trade to drag it down to their own miserable standard of doing business.

### FUNERAL OF GEORGE LINN

The chapel of Crow's Nest Funeral Home, Blainmore, was filled with relatives and friends of the late George Linn on Sunday afternoon, when Rev. A. E. Larke conducted the funeral service. Many of his Masonic brethren were in attendance.

Many cars followed in the funeral procession, as well as a large number of acquaintances on foot. Beautiful floral tributes bore tribute to the sympathy and respect of friends to the bereaved family. The chief mourners were Mrs. Linn, daughter and son, and Mrs. and Mrs. Alex. Irvine, of Coleman. Deceased originally came from Scotland, and had lived in Lethbridge, Frank and Blainmore for many years.

### EASY WAY TO PROVIDE COST OF IMPROVEMENTS

Many home owners are taking advantage of loans under the Home Improvement Plan to make improvements to their homes. The total for all Canada recorded in a bulletin recently issued is 15,971 loans amounting to \$5,250,809.09. See your local contractor if you desire to make improvements under this plan, whereby the interest is only 3 1/2 per cent on loans up to \$2,000. Further details available from H. T. Halliwell, chairman of the local H.I.P. committee.
